

# Environmental product declaration in accordance with ISO 14025 and EN 15804+A2

Smooth PVC installation pipe 750N with low friction

The Norwegian EPD Foundation

Owner of the declaration:

Pipelife Sverige AB

**Product:** 

Smooth PVC installation pipe 750N with low friction

**Declared unit:** 

1 kg

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR

NPCR Part A: Construction products and services

**Program operator:** 

The Norwegian EPD Foundation

**Declaration number:** 

NEPD-4416-3633-EN

**Registration number:** 

NEPD-4416-3633-EN

Issue date:

02.05.2023

Valid to: 02.05.2028

**EPD Software:** 

LCA.no EPD generator ID: 58768

#### **General information**

#### Product

Smooth PVC installation pipe 750N with low friction

#### **Program operator:**

Post Box 5250 Majorstuen, 0303 Oslo, Norway The Norwegian EPD Foundation Phone: +47 23 08 80 00 web: post@epd-norge.no

#### **Declaration number:**

NEPD-4416-3633-EN

#### This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR NPCR Part A: Construction products and services

### Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### **Declared unit:**

1 kg Smooth PVC installation pipe 750N with low friction

#### Declared unit (cradle to gate) with option:

A1-A3,A4,A5,C1,C2,C3,C4,D

#### **Functional unit:**

#### General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

## Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

#### Owner of the declaration:

Pipelife Sverige AB Contact person: Phone: +46 513 22114 e-mail: yvette.lennartsson@pipelife.com

#### Manufacturer:

Pipelife Sverige AB

#### Place of production:

Pipelife Sverige AB Box 50 SE-524 02 Ljung , Sweden

## Management system:

EN ISO 9001:2015 and EN ISO 14001:2015

### Organisation no:

SE556087042901

#### Issue date:

02.05.2023

#### Valid to:

02.05.2028

### Year of study:

2022

## **Comparability:**

EPD of construction products may not be comparable if they not comply with EN 15804+A2 and seen in a construction context.

#### **Development and verification of EPD:**

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway.

Developer of EPD: Yvette Lennartsson

Reviewer of company-specific input data and EPD: Bjørn Svensson

#### Approved:

Michael M. Jenssen, Asplan Viak AS

(no signature required)

Håkon Hauan, CEO EPD-Norge

#### **Product**

### **Product description:**

Smooth PVC installations pipes for Electro in house applications, with low friction inside layer.

#### **Product specification**

70005366, 70005367, 70005368, 70005369, 70005370, 70005371, 70005879, 70005880, 70005881, 70005883, 70008584, 70005885, 70005374, 70005375, 70005382, 70005383, 70005384, 70005385, 70005386, 70005387

Product related data to be found at Pipelife Sverige AB product catalogue https://catalog.pipelife.com/se

| Materials                       | kg   | %     |
|---------------------------------|------|-------|
| Fire-, heat- and UV-stabilizers | 0,02 | 2,42  |
| Filler                          | 0,09 | 8,64  |
| Plastic                         | 0,03 | 2,50  |
| Polyvinyl chloride (PVC)        | 0,86 | 86,44 |
| Total                           | 1,00 |       |

#### **Technical data:**

PVC material with density 580 kg/m3 Produced according EN 61 386-1,-21 Stiffness 750N

#### Market:

Europe, with scenario made for the Swedish market.

#### Reference service life, product

Lifetime on product calculated more than 100 years.

#### Reference service life, building

#### LCA: Calculation rules

#### **Declared unit:**

1 kg Smooth PVC installation pipe 750N with low friction

#### **Cut-off criteria:**

#### Allocation:

#### Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

| Materials                       | Source        | Data quality | Year |
|---------------------------------|---------------|--------------|------|
| Filler                          | ecoinvent 3.6 | Database     | 2019 |
| Fire-, heat- and UV-stabilizers | ecoinvent 3.6 | Database     | 2019 |
| Plastic                         | ecoinvent 3.6 | Database     | 2019 |
| Polyvinyl chloride (PVC)        | ecoinvent 3.6 | Database     | 2019 |

## EPD Process A1 - D VP PIPES

Additional technical information:

#### LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

A5 = 5 % product losses during installation are estimated by the company. No energy use has been quantified since installation in buildings is often done by manual labour. Use of portable electrical devices (e.g., drill) usually have low energy requirements falling under the cut-off criterion of 1%.

C1 = de-construction in buildings is often done by manual labour. Use of portable electrical devices (e.g., drill) usually have low energy requirements falling under the cut-off criterion of 1%.

C3 and C4 = Waste treatment of the product follows the default values provided in EN 50693, Product Category Rules for life cycle assessments of electronic and electrical products and systems, table G.4. This table specified how different types of raw materials used in A1 will likely be treated during the end-of-life of the product. Waste treatments in C3 include material recycling and incineration with and without energy recovery and fly ash extraction. Disposal in C4 consist of landfilling of different waste fractions and of ashes.

D = The recyclability of metals and plastics allows the producers a credit for the net scrap that is produced at the end of a product's life. The benefits from recycling of net scrap are described in formula from EN 15804:2012+A2:2019. Substitution of heat and electricity generated by the incineration with energy recovery of plastics is also calculated in module D.

| Transport from production place to user (A4)  | Capacity utilisation                     | Distance (km) | Fuel/Energy Consumption | Unit  | Value                  |
|---|--|---------------|-------------------------|-------|------------------------|
|   | (incl. return) %                         |               | . 32                    |       | (Liter/tonne)          |

PM = Particulate Matter emissions; IRP = Ionizing radiation – human health; ETP-fw = Eco toxicity – freshwater; HTP-c = Human toxicity – cancer effects; HTP-nc = Human toxicity – non cancer effects; SQP = Soil Quality (dimensionless)

<sup>&</sup>quot;Reading example: 9,0 E-03 = 9,0\*10-3 = 0,009" \*INA Indicator Not Assessed

<sup>1.</sup> The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

<sup>2.</sup> This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

## **Additional requirements**

## Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix           | Data source   | Amount | Unit         |
|---------------------------|---------------|--------|--------------|
| Electricity, Sweden (kWh) | ecoinvent 3.6 | 54,94  | g CO2-eg/kWh |

#### **Dangerous substances**

No substances given by the REACH Candidate list or the Norwegian priority list are intentionally added to the product.

#### **Indoor environment**

## **Additional Environmental Information**

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
