

powerbar Sch

EURO POWERBAR is OE's traditional power strip, offering 3 or 5 Schuko sockets in a robust metal housing. Suitable for installing under-surface, to cable baskets, screens and other furniture panels, EURO POWERBAR is versatile in its application.

The integrated GST18i3 connectors allow units to be clipped together or interlinked by cables with other OE power modules and POWERBAR EURO can be paired with QIKTRAY for a neat, under-desk power and cable management solution.

USPs

- Three or five gang option
- Tough metal housing
- Standard colour is Black
- Safety standards compliant
