# FibreFlow Generic Specification DBmf Microducts and Bundles (7/3.5 & 7/4)

Microduct and sheath colour for illustration

**GENERIC PRODUCT DESCRIPTION**: Assemblies of strong 7mm polyethylene (PE) microducts (m/d), each with low friction performance. These m/ds will accept all blown fibre products that can be installed into the more traditional 5/3.5 m/ds. There is a choice between 7/3.5 and 7/4. Each 24-way has a strong 14/10 m/d in the centre. Each assembly (bundle) is surrounded by a thin strong PE sheath. These strong metal-free bundles are designed for direct burial in suitably prepared ground. Burial of the individual m/ds must be in ground free from hard, heavy or sharp material.

- 1. These m/ds are compatible with designated 7mm push-fit connectors.
- 2. Max air pressure for blowing: 20bar.
- 3. Storage of unprotected primary m/ds: Indoors and well shielded from daylight.

<sup>\*</sup> After applying pulling tensions, allow time for the pulled product to relax. See Installation manual.

Sheath thickness: 1.1mm nominal

Sheath Removal: Use sheath removal tools. Take care not to damage m/d.
