

## EUROLAN Microduct Accessories Divisible duct repair kit

### Ordering information

Part number	E-number	Description
823507	5045556	Divisible duct repair kit 7MM blue
823514	5045557	Divisible duct repair kit 14MM yellow
823516	5045558	Divisible duct repair kit 16MM purple

The divisible duct repair kit is suitable for connecting and repairing subducts which contain a cable. Our divisible sealing system enables you to install it easily onto existing installations.

By applying the locking keys onto the shells, the rubber insert is compressed and creates a firm gas- and watertight seal of 0,5 bar.

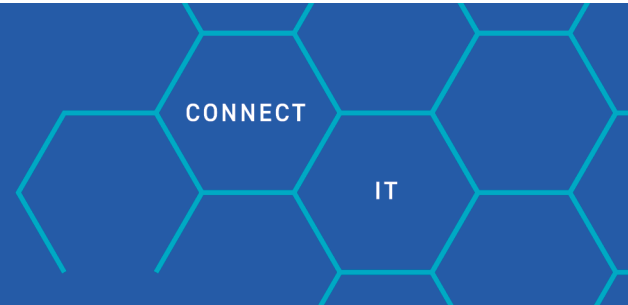

The locking keys can now also be mounted with use of pliers. The new grip rings create a high strain relief on the ducts.

Suitable for blowing in new cables.

### Features

- Gas and Watertight up to 0,5 bar
- During 30 minutes up to 10 bar
- For connecting and repairing of damaged ducts
- Applicable for direct burying
- Suitable for retro fitting
- Easy installation
- Slim design
- Rubbers seals with color coding
