## Powered By Shelly

EAN: 3800238072032

### Product description

The Ecowitt Weather Station is a premium smart weather station delivering a wide range of accurate local weather data. Communicating via Bluetooth, it integrates seamlessly into the Shelly Smart Control app as well as across Shelly’s extensive third-party integrations.

When connected to the app, the weather station enables automation based on local weather conditions. For example, awnings can automatically retract when the wind increases, or irrigation systems can shut off when rainfall is detected.
