Ecowitt WS90 Bird Spikes

Bird spikes for Ecowitt weather station

EAN code: 3800238072865

Product description

Ecowitt WS90 Bird Spikes is a set of detachable metal bird spikes designed to stop birds from landing on the rain collector and sensor array of the Ecowitt WS90 weather station (Powered by Shelly, EAN 3800238072032).

Perching birds can cause false rainfall readings and soil the sensor; the spikes keep them away, helping maintain clean, accurate measurements. The set attaches with an adjustable strap around the sensor and installs without tools.

Made of weatherproof metal for year-round outdoor use. It is also compatible with the Ecowitt WS85, WS80, WS69 and WH40 sensor arrays.
