General Customer information on REACH

Regulation (CE) 1907/2008 REACH for the Registration, Evaluation and Authorization of Chemicals. Update considering the Candidate List Additions as of June 2023

Due to the enforcement of the chemicals Regulation (CE) 1907/2006 named REACH (Registration, Evaluation and Authorization of Chemicals), we would like to inform you of the obligations and restrictions which have been activated since June 2007. Briefly, the purpose of this regulation is to strengthen the chemical control in all of Europe and to offer better protection of human and environmental health.

The Evaluation and Registration obligation is valid for all producers and importers who introduce a chemical substance into the European market in amounts greater than 1 Ton a year. Particularly dangerous, and listed in the regulation, are substances subject to an additional duty authorization. Any substances not pre-registered will be forbidden from the European market until their registration.

CORTEM S.p.a is a producer of *explosion-proof electrical equipment and fittings for explosion-proof electrical systems for industrial plants*. We have already ensured our European suppliers have pre-registered the chemical substances supplied to us and utilized in the preparation and assemblage of our products. In the manufactured product, the present chemical substances are lower than the 0.1% of the weight. Therefore, CORTEM does not need the registration and duty authorization.

We are at your disposal for any clarification.

Kind regards,

Cortem spa
