Enegic is an innovation developed by a tightly-knit team with more than ten years of experience with IoT. Our unique hardware and software have helped many thousands of homes take control over the property's power consumption. As a bonus the electricity grid is spared unnecessary stress – and you can save money.

Since the start, it has been our goal to provide you with the best service possible. The Enegic you hold in your hand is therefore carefully designed to be small, powerful, and smart enough to care for all aspects of your power management. And since we are talking about control: You can access all data regarding your property's electricity usage in our app.

Install the Enegic, configure, and let the Enegic system handle the rest.

1 X Enegic monitor one
(included)

Measuring unit

1 X P1/RJ12
(included)

P1/RJ12 measuring and
power supply

1 X USB adapter / DIN adapter
(optional)

Additional power supply

Real-time net energy data

Get a clear overview of your property's net energy in real-time

Charging load management

Manage your EV charging load for optimized charging

Dynamic power management

× Fuse level

✓ Available

↓ Total output

Allow Enegic to calculate power output levels for a safe power consumption

Data information in app

enegic

Get access to live reports of the property's net energy and manage your power options in the Enegic app
